

a) Shift mode for spatial scaling

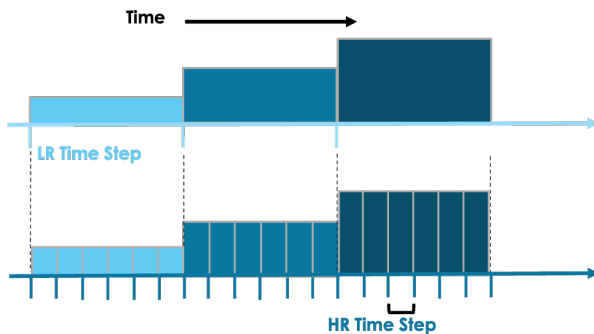

$$b_o = 0$$

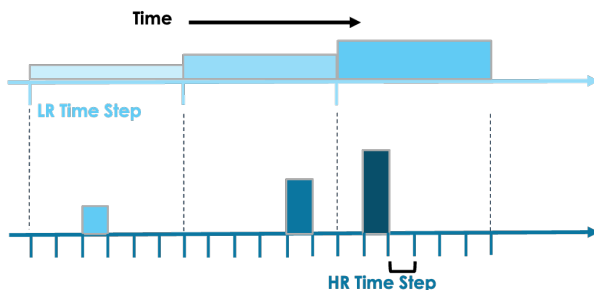

$$b_o \approx \left| \frac{\Delta X_H^2 - \Delta X_L^2}{\Delta X_L^2} \right| \times 100$$

b) Shift mode for temporal scaling

$$b_o = 0$$

$$b_o \approx \left| \frac{\Delta t_H - \Delta t_L}{\Delta t_L} \right| \times 100$$
